

Otago ENGINEERING

ROTARY CLOTHESLINES

You remember when Gran's knickers were blown off the line by a strong wind, back when clotheslines were built to last, you don't have to worry now, the "Great New Zealand Rotary Clothesline", is made right here today in Dunedin! At Otago Engineering our rotary clothesline range is made in different sizes from non-rust galvanised steel and are known to be one of the strongest rotary clotheslines available on the market. They are built to withstand the elements and particularly suitable for high wind areas.

These clotheslines are direct from the factory and we can even install your new clothesline for you!

Features of this clothesline include:

- Galvanized pipe pole
- Angle arms and rod stays, all hot dip galvanized
 - Genuine galvanized clothesline wire
- Option of buying direct from the factory or installation by us Otago Engineering
